## SUMMARY

---

Highly motivated and self-taught AI Automation builder with a proven track record of independently developing and deploying real-world SaaS products. Specializing in AI-driven workflow optimization and no-code/low-code solutions, I leverage advanced tools and strategic planning to deliver impactful results and enhance operational efficiency. Eager to contribute expertise in AI Automation, no-code/low-code development, and freelance tech roles.

## EXPERIENCE

---

### Freelance AI Automation Specialist

Raipur, India

July 2025 – Present

- Designed and implemented robust AI automation workflows using **n8n**, integrating various **APIs** and **webhooks** to streamline complex business processes, resulting in a significant reduction in manual effort.
- Developed and deployed custom **Large Language Model (LLM)** integrations to enhance data processing and content generation capabilities, improving efficiency and accuracy in automated tasks.
- Orchestrated end-to-end process automation initiatives, identifying key areas for improvement and deploying **no-code/low-code** platforms to achieve measurable gains in productivity and operational throughput.
- Implemented **Automation Testing** and **Performance Optimization** protocols to ensure the reliability and scalability of AI-driven systems.
- Conducted **AI Solution Validation** and strategic planning for new product features, bridging the gap between technical feasibility and business impact.

## PROJECTS

---

### InkTwin — [inktwin.primuez.com](https://inktwin.primuez.com)

- Developed and deployed an AI-powered SaaS product designed to automate content creation and digital marketing workflows for small businesses.
- Leveraged **LLM Integration** and **API Integration** to generate tailored marketing copy, social media posts, and email campaigns, significantly reducing manual effort and improving content output.
- Built with a **No-Code/Low-Code** approach, enabling rapid iteration and deployment of new features based on user feedback.

### PrimuezSure — [primuezsure.primuez.com](https://primuezsure.primuez.com)

- Created an autonomous AI insurance advisor that simplifies complex policy documents for users, providing clear and concise explanations of coverage and terms.
- Utilized **LLM Integration** to process and interpret insurance policies, offering personalized advice and answering user-specific queries based on uploaded documents.
- Designed as a **SaaS automation tool** to empower individuals to better understand their insurance, reducing confusion and improving decision-making.

### Portfolio — [primuez.com](https://primuez.com)

A comprehensive showcase of my work in AI automation, no-code development, and technical problem-solving.

## SKILLS

---

**Technical:** n8n, Workflow Automation, AI Solution Validation, LLM Integration, API Integration, Webhooks, No-Code/Low-Code Development, Process Automation, RPA, Automation Testing, Performance Optimization, Prompt Engineering, SaaS Development

**Professional:** Project Management, Strategic Planning, Continuous Learning, Problem Solving, Attention to Detail

## EDUCATION

---

### Bachelor of Computer Applications (BCA)

*Shri Shankaracharya Institute of Professional Studies*

*Currently Pursuing*

### Secondary Education

*KPS, Dunda*

*Completed*

## CERTIFICATIONS

---

- **n8n Certified Professional:** Official badge holder of all available n8n certifications.
- **SimpliLearn Certified:** n8n Automation Completion.
